### DETAILED ACTION

1. The following is a Notice of Allowability in response to the Amendment received on 3 October 2005. Claims 1-12 have been amended. Claim 13 has been added. Claims 1-13 are now pending in this application.

### REASONS FOR ALLOWANCE

2. Claims 1-13 are allowed.

3. The following is an examiner's statement of reasons for allowance:

As per claim 1, the prior art of record taken alone or in combination fails to teach a linear predictive controller configured to predict linear changes of said main duty cycle signal in response to changes in said output signal, and configured to produce a predictive duty cycle signal from said output signal in a second feedback loop, wherein said predictive duty cycle signal is indicative of said linear changes.

As per claim 4, the prior art of record taken alone or in combination fails to teach a linear predictive controller coupled to said DC-DC block in a second feedback loop, and configured to produce a predictive duty cycle signal in response to changes in said output signal.

As per claim 9, the prior art of record taken alone or in combination fails to teach linearly predicting changes of duty cycle in response to changes of said output signal to produce a predictive duty cycle in a second feedback loop.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
